Abstract

Sixty-four species of Heteroptera, in 46 genera, are recorded for the first time from Argentina; these belong to nine families: Schizopteridae (1 sp.), Reduviidae (10 sp.), Miridae (40 sp.), Nabidae (1 sp.), Largidae (1 sp.), Pyrrhocoridae (1 sp.), Lygaeidae (3 sp.), Pachygronthidae (1 sp.), and Rhyparochromidae (6 sp.).

Fifteen genera represent new records, and the tribes Cylapini Kirkaldy 1906 (Miridae: Cylapinae), Phorticini Kerzhner 1971 (Nabidae: Prostemmatinae), and Udeocorini Sweet 1967 (Rhyparochromidae: Rhyparochrominae) are recorded for the first time from this country as well.

Key words: New records, Argentina, terrestrial Heteroptera

Introduction

The Hemiptera currently ranks as the fifth most specious order of insects, after beetles, flies, wasps, and moths (Wilson 1992), and is the largest of the hemimetabolous orders. The suborder Heteroptera contains herbivores, predators, and haematophages. Some are economically important, either negatively as pests of crops, or positively as biological control agents. Others (Reduviidae: Triatominae) are important as vectors of Chagas' disease, one of the most important diseases in South America.

The number of species recorded to Argentina at this moment is very small compared to the known diversity of Heteroptera. Many species remain unstudied and unrecorded in national collections because of the lack of taxonomists of this group in the country.

With the aim of improving the knowledge of the biodiversity of terrestrial Heteroptera from Argentina, we have published two contributions with new records (Melo & Coscarón 2004, Melo *et al.* 2004). Continuing with this goal, in this paper we record 64 species of

Heteroptera for the first time from Argentina, belonging to nine families: Schizopteridae (1 sp.), Reduviidae (10 sp.), Miridae (40 sp.), Nabidae (1 sp.), Largidae (1 sp.), Pyrrhocoridae (1 sp.), Lygaeidae (3 sp.), Pachygronthidae (1 sp.), and Rhyparochromidae (6 sp.).

The genera *Ptenidophyes* Reuter 1891 (Schizopteridae), *Nalata* Stål 1860, *Pseudosaica* Blinn 1990, *Vescia* Stål 1865 (Reduviidae), *Thaumastaneis* Kirkaldy & Edwards 1902 (Largidae), *Hadronemisca* Carvalho 1973, *Kamaiurana* Carvalho 1952, *Marinonicoris* Carvalho 1988b, *Valdasus* Stål 1860 (Miridae), *Phorticus* Stål 1860 (Nabidae), *Pachygrontha* Germar 1837 (Pachygronthidae), *Neopetissius* O'Donnell 2001, *Myodocha* Latreille 1807, *Pephysena* Distant 1882, *Tempyra* Stål 1874 (Rhyparochromidae); and the tribes Cylapini Kirkaldy 1906 (Miridae: Cylapinae), Phorticini Kerzhner 1971 (Nabidae: Prostemmatinae), and Udeocorini Sweet 1967 (Rhyparochromidae: Rhyparochrominae) represent new records from Argentina.

The material examined belongs to the collections of Museo Argentino de Ciencias Naturales, Argentina (MACN), Museo de Ciencias Naturales de La Plata, Buenos Aires, Argentina (MLP) and Dr. Rodolfo U. Carcavallo's and Carpintero's collection.

Pseudopachybrachius concepcioni Zheng & Slater 1984: 112-113

Geographic distribution: Bolivia, Dominica, Dominican Republic, Grenada, Trinidad.

Studied material: 1 female, Corrientes, Ituzaingó, Reserva Santa María, 27-IV-2003, light trap, P.M. Dellapé col. (MLP); 2 females, same data, M.C. Melo col. (MLP); 2 females, same locality, 29-IV-2003, light trap, P.M. Dellapé col. (MLP); 1 female, same locality, 30-IV-2003, light trap, M.C. Melo col. (MLP); 1 male, same locality, 30-IV-2003, light trap, P.M. Dellapé col. (MLP).

Udeocorini***Tempyra biguttula* Stål**

Tempyra biguttula Stål 1874: 157

Epelytes draptes Kirkaldy 1910: 119

Tempyra biguttata (sic): Froeschner 1944: 664

Geographic distribution: Galapagos Islands, Hawaii, Mexico, USA.

Studied material: 1 male, Entre Ríos, Concordia, D.J. Carpintero col., *Tempyra biguttula* det. J.A. Slater 1981 (MLP). 1 male, Chubut, Gaiman, 2005, G. Cheli col. (MLP). 1 female, Entre Ríos, Concordia, 1980, Viana col., *Tempyra biguttula* det. J. A. Slater 1981 (CC).

Acknowledgments

We express our gratitude to Dr. Axel O. Bachmann (Departamento de Entomología, Museo Argentino de Ciencias Naturales, Buenos Aires, Argentina) for the loan of material.

This work was supported by Consejo Nacional de Investigaciones Científicas y Técnicas (CONICET).
