So far, *Fulvius borgesii* Chérot, J. Ribes & Gorczyca, 2006 (Heteroptera: Miridae: Cylapinae) has been reported from the islands of La Palma and Tenerife (Canary Islands, Spain) (ROCA-CUSACHS *et al.*, 2016, 2020; VAN DER HEYDEN, 2024).

Herein, the first record of *F. borgesii* from the island of Gran Canaria is reported: On 30-05-2025, an adult specimen (Fig. 1) was observed north of San José del Álamo, located in the northern part of the island (coordinates: 28.0838819561, -15.5083813165). Three photographs of the specimen were uploaded to the online database iNaturalist (see [here](#)).

Acknowledgements

I like to thank Carmen D. González for allowing me to use her photo of *F. borgesii* to illustrate this note.
